

Ficha - ejercicio 01- **Calculadora**

Formulario

The image shows a Windows application window titled "Form1". Inside the window, there is a calculator interface. It consists of two text boxes at the top, one containing "345" and the other "23". Between them is a "*" symbol. To the right of the second text box is an "=" symbol, and further right is another text box containing "7935". Below these elements are four buttons: "+", "-", "*", and "/". The "*" button is currently selected, highlighted with a blue border.

Modificaciones

Comando	Valor modificado
txt1 (TextBox)	Name: txt1 Font size: 24 Text: vacio
txt2 (TextBox)	Name: txt2 Font size: 24 Text: vacio
lblSim (Label)	Name: lblSim Font size: 14 Text: +
lblIgual (Label)	Name: lblIgual Font size: 14 Text: =
lblRes (Label)	Name: lblRes Font size: 24 Text: 00
cmdSuma (Button)	Name: cmdSuma Font size: 14 Text: +
cmdResta (Button)	Name: cmdResta Font size: 14 Text: -
cmdMultiplicar (Button)	Name: cmdMultiplicar Font size: 14 Text: *
cmdDividir (Button)	Name: cmdDividir Font size: 14 Text: /

Código

```
Public Class Ejercicio01
```

```
    Private Sub cmdSuma_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)  
Handles cmdSuma.Click
```

```
        'Cambia el símbolo a + al hacer click sobre el botón suma  
Me.lblSim.Text = "+"  
        'Suma los dos valores introducidos y los muestra en la etiqueta final  
Me.lbl1.Text = Val(txt1.Text) + Val(Txt2.Text)
```

```
    End Sub
```

```
    Private Sub cmdResta_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)  
Handles cmdResta.Click
```

```
        'Cambia el símbolo a - al hacer click sobre el botón resta  
Me.lblSim.Text = "-"  
        'Resta los dos valores introducidos y los muestra en la etiqueta final  
Me.lbl1.Text = Val(txt1.Text) - Val(Txt2.Text)
```

```
    End Sub
```

```
    Private Sub cmdMultiplicar_Click(ByVal sender As System.Object, ByVal e As  
System.EventArgs) Handles cmdMultiplicar.Click
```

```
        'Cambia el símbolo a * al hacer click sobre el botón multiplicación  
Me.lblSim.Text = "*"  
        'Multiplica los dos valores introducidos y los muestra en la etiqueta final  
Me.lbl1.Text = Val(txt1.Text) * Val(Txt2.Text)
```

```
    End Sub
```

```
    Private Sub cmdDividir_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)  
Handles cmdDividir.Click
```

```
        'Cambia el símbolo a / al hacer click sobre el botón división  
Me.lblSim.Text = "/"  
        'Divide los dos valores introducidos y los muestra en la etiqueta final  
Me.lbl1.Text = Val(txt1.Text) / Val(Txt2.Text)
```

```
    End Sub
```

```
End Class
```
